Felipe Afonso

Software Engineer
São Pedro, São Paulo, Brazil

Summary

I'm a Software Engineer with 8+ years of experience, focused on designing, building and deploying end to end applications. I've worked with US real estate, fintech, agronomy and AI compliance industries. I love working with startups shipping features and apps efficiently in fast-paced environments.

Experience

Venture Lab Niterra Group
Software Engineer
May 2025 - Present (10 months)
Estados Unidos

Helping out the US venturing team at Niterra's create and expand their internal tooling with full stack applications with deep third party integrations.

The Basement LAB
Software Engineer
June 2025 - October 2025 (5 months)
Spain

- Lead the front end team into rewriting the legacy application into a powerhouse capable of dealing with a slow API with reduced latency for the customers;
- Reduced applications time to log in from 25s into 7s;
- Created a reusable and open source component library to be used across all the company's web applications;

HomeOptions
Software Engineer
May 2022 - June 2025 (3 years 2 months)
Bellevue, Washington, United States

- Worked closely with Finance and Product teams to prototype a new platform for debt settlement compliance management using Svelte Kit. And then built said platform with a performance-oriented profile using GoLang, HTMX and Tailwind.

- Created an application for sales agents to hand off their calls to an AI assistant, streamlining contract reading processes.
- Built a custom CRM platform with SvelteKit and Express, tailored to seamlessly integrate with Twilio's Call Center app, enhancing agent productivity and improving customer interactions.
Developed internal tools for campaign management, partner landing page customization, and contract tracking, streamlining workflows and enhancing efficiency.
- Envisioned and implemented a comprehensive cookie banner solution using Svelte Kit, catering to both internal website needs and external clients as a SaaS product.
- Designed and iterated with other teams to prototype diverse landing portals and other SEO centric websites. And then leveraged technical expertise to create and deploy performant, SEO-compliant portals that directly contributed to increased website traffic, lead generation, and overall business growth.
- Revamped the legacy user portal, migrating it from a complex React SPA to a streamlined NextJS SSR architecture, enhancing performance, SEO and form conversion.

Santos Lab

Front End Lead

March 2018 - May 2022 (4 years 3 months)

Rio de Janeiro, Brasil

- Progressed from Junior Frontend Developer to Development Team Leader over 4 years, mentoring team members and driving significant projects that aligned with company growth objectives.
- Led a team of 5 engineers in the development of a comprehensive precision agriculture platform. Successfully bridged the gap between front-end and back-end teams, ensuring alignment with user needs and agricultural procedures.
- Developed a React/TypeScript precision agriculture platform, integrating drone, satellite, and in-field data to provide farmers actionable insights. Leveraged Turf.js and Leaflet for geospatial analysis, making it a very rich web experience for farmers. And then turned it into a React Native app for

offline field data collection, ensuring seamless synchronization with a precision agriculture platform to generate maps and reports, empowering farmers with real-time insights.

- Developed an MVP React.js platform enabling agronomists to upload various map formats (.KMZ, .SHP, .TIF, .KML, .PNG) and farmers to access them for informed decision-making. The platform's intuitive interface featured a split-view for map comparison, multiple object handling, and various measurement tools.

- Successfully maintained and revitalized a legacy application, identifying and resolving critical issues while adapting it to evolving business needs. This work laid the groundwork for the development of a comprehensive precision agriculture platform.

Instituto Federal de Educação, Ciência e Tecnologia de São Paulo - IFSP

Graduate Student Mentor

May 2018 - December 2018 (8 months)

Piracicaba

I've mentored a student in a project using Kotlin and Kotlin/Native to develop an Android app for his final graduation project.

It was an volunteer work for graduates from IFSP.

Instituto Federal de Educação, Ciência e Tecnologia de São Paulo - IFSP

Graduate Student Mentor

September 2017 - October 2017 (2 months)

Piracicaba

I've created an Agile methods course along 6 weeks, while mentoring and evaluating the students. It was mostly virtual using Google Classroom.

It was an volunteer work for graduates from IFSP.

Autônomo

Mobile Developer

February 2017 - June 2017 (5 months)

São Carlos, São Paulo - Brasil

Along with 2 other colleagues from my Master's Course, I participated in a startup contest for Itaú (one of Brazil's largest banks). We developed a micro-investing app which would integrate to its bank account (through Itaú's APIs)

and round up every purchase from the credit card. That rounding up would be accumulated in a separate account and be invested in a trading fund. The app was made with native java android SDK for the front end, and integrated with an REST api. We didn't ended up on the top 3, but during the process we stumbled on various (mostly legal) complications and it was an enlightening experience for my career and problem solving skills.

Instituto Federal de Educação, Ciência e Tecnologia de São Paulo - IFSP

Web Development Monitor

August 2016 - December 2016 (5 months)

Piracicaba, São Paulo

I was the Web Development class monitor at my graduation. I was responsible for helping other students with their web projects, which were mostly in .NET Razor, or jQuery and PHP. It was a scholarship project.

Along my Web Development Monitoring Scholarship I created a web platform for scheduling monitoring sessions for the students. It was made with .NET Razor and Entity Framework. It ended up being used by our campus for 2 years;

Education

Universidade Federal de São Carlos

Master of Computer Science, Computer Software Engineering · (2017 - 2020)

Instituto Federal de Educação, Ciência e Tecnologia de São Paulo - IFSP

Bachelor of Technology (B.Tech.), Computer Systems Analysis/

Analyst · (2014 - 2016)
